PROFILE

Full-stack developer in Barcelona who builds web products end to end with React, Next.js, TypeScript and NestJS. I come from graphic and 3D design, so I care about polished, fast interfaces as much as clean backend code. Through my own studio I design and ship websites for local businesses, and I recently built an AI-powered WhatsApp assistant with OpenAI, Twilio and Firebase. Looking for a full-stack or frontend role in a product team.
